### **KRAIBURG TPE Publishes Its First Global Sustainability Report**

**The new company-wide report, prepared in accordance with the European Sustainability Reporting Standards (ESRS), provides detailed insights into ESG performance, climate action commitments, and material innovations across KRAIBURG TPE's global operations.**

With the publication of its first company-wide Sustainability Report, KRAIBURG TPE provides customers, partners, and other stakeholders with a transparent overview of its environmental, social, and governance (ESG) performance. The report covers all three production sites and outlines the company's sustainability strategy as well as its progress and achievements. Prepared in accordance with the simplified European Sustainability Reporting Standards, it shows how sustainability is integrated into KRAIBURG TPE's business model—from product development and responsible sourcing to climate action, circular economy initiatives, and employee well-being.

“Customers increasingly expect reliable sustainability information alongside high-performance materials. Our report shows how we integrate sustainability into product development, sourcing and manufacturing while supporting customers with material solutions for more circular applications,” said Oliver Zintner, CEO of KRAIBURG TPE. “Our first company-wide Sustainability Report shows the measures we have implemented, the progress we have achieved, and the areas where we continue to improve. Sustainability is integrated into the way we develop materials, work with partners, and support customers in achieving their own environmental goals.”

## Press release

### **KRAIBURG TPE Publishes Its First Global Sustainability Report**

Waldkraiburg, August 2026

Page 2 of 4

Beyond environmental performance, the report also outlines KRAIBURG TPE's approach to responsible business practices, including governance, compliance and responsible supply chain management. During the reporting period, all relevant suppliers at the company's production sites signed the Supplier Code of Conduct, were covered by sustainability clauses and underwent CSR assessments.

### **Highlights from the 2025 Sustainability Report**

The report presents several key milestones and commitments, including:

- EcoVadis Gold rating for all production sites
- Expansion of recycled-content, bio-based and ISCC PLUS-mass balanced TPE solutions
- Progress in Loop TPE take-back and reprocessing concepts
- 100% renewable electricity at production sites in Germany and the United States

### **Supporting customers through material innovation and circularity**

For KRAIBURG TPE, sustainability is closely linked to material innovation and the transition towards a circular economy. The company continues to expand its portfolio of recycled-content, bio-based and ISCC PLUS-mass balanced TPE solutions while developing circular material concepts such as Loop TPE. Through this initiative, TPE materials processed by the customer can be taken back, reprocessed into TPE compounds and supplied back to customers, which can help conserve valuable resources.

In addition to developing more circular materials, KRAIBURG TPE supports customers with Product Carbon Footprint calculations, material selection consultancy and guidance on downstream processing and end-of-life options. Together with co-recyclability assessments for selected grades in PP and HDPE recycling streams, these services help customers make informed material decisions.

### About KRAIBURG TPE

KRAIBURG TPE ([www.kraiburg-tpe.com](http://www.kraiburg-tpe.com)) is a global manufacturer of custom thermoplastic elastomers. KRAIBURG TPE was founded in 2001 as an independent business unit of the KRAIBURG Group and is now the industry's competence leader in the field of TPE compounds. The company's goal is to provide safe and reliable products for customer applications. With more than 660 employees worldwide and production sites in Germany, the USA and Malaysia, the company provides a large product portfolio for applications in the automotive, industrial and consumer goods industries, as well as for the strictly regulated medical sector. The established THERMOLAST®, COPEC®, HIPEX® and For Tec E® product lines are processed by injection molding or extrusion and offer manufacturers numerous advantages not only in processing but also in product design. KRAIBURG TPE is characterized by its innovative strength, global customer orientation, customized product solutions and reliable service. The company is ISO 50001 certified at its headquarters in Germany and holds ISO 9001 and ISO 14001 certifications at all its sites worldwide.
